WHOLESALE TRADE LIST

THOMAS MEEHAN & SONS

GERMANTOWN, PHILADELPHIA, PA.

NOTICE TO CUSTOMERS

In ordering stock sent by mail, add ten cents on every dollar for Deciduous Trees, and fifteen cents for Evergreens, to prepay postage. For Seeds, ten cents per pound.

Parties are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgement; but in no case do we assume any responsibility after the goods are shipped, unless for our own mistake.

Shipping is direct from Germantown to any part of the world, by sea or land.

Terms, in all cases, cash, on or before delivery to express or railroad agents, unless by special arrangement.

Five hundred, fifty, and five, will be furnished at the thousand, hundred, and ten rates respectively. Packing charged extra.

Post Office Orders payable at Station G, Philad'a.

Our Retail Catalogue is complete and will be sent to all applicants.

Visitors are always welcome, and should take train at 12th and Market Sts., Philadelphia, for Chestnut Hill, getting off at WALNUT LANE STATION;—or at Broad and Filbert Streets, getting out at CARPENTER STREET STATION. Trains run every half hour, both ways. Cabs at both stations.

JAPAN SNOWBALL.

(*Viburnum Plicatum*)

A new variety of Snowball from Japan. Growth upright and compact. Foliage olive green through the summer, but toward fall it turns much darker and remains on the plant for some time after the first frosts. Flowers though hardly as large as the old variety, are much more numerous. The leaves are in pairs along the stem, and from the base of each leaf a ball of flowers appears. There are often as many as ten pairs of these, or twenty balls, on a branch 18 inches long. These balls as they expand, all face upward, so that a full view of their great beauty is always to be had. To be a universal favorite a shrub must be hardy, easily transplanted and its growth of good shape, and beautiful both in leaf and flower, and the Japan Snowball embraces all of these points to the fullest extent.

See page 21.

☞ We furnish the above electrotype to customers at a low price. ☜

Deciduous Trees.

The letters (tr) signify that the stock has been once or more transplanted.

ACER POLYMORPHUM ATROPURPUREUM.

(Japan Blood-leaved Maple.)

We invite the attention of our customers to the very low prices at which we are offering these plants this year. We claim that they are superior to all others as we have them *all on their own roots.* They grow better and hold a better color than grafted plants, and the vitality is greater. We now make them one of our specialties, and grow a large supply yearly.

The color of the foliage is a rich wine, and the plant frequently makes a second growth in the fall, the color of which is darker than at midsummer. See page 4.

CERCIDIPHYLLUM JAPONICUM.

The Cercidiphyllum we have found to be a very salable tree. The foliage is pretty, the dark green of the upper surface of the leaves and the silvery underside, with the dark red stalks, forming a nice contrast. It has an upright habit of growth without being stiff looking. It is a quick grower, perfectly hardy, and is easily transplanted. It is a beautiful tree for cemetery work or for avenue planting.

Cercidiphyllum Japonicum.—(5 years growth; 8 feet high.) See page 7.

WHITE FLOWERED, RED FLOWERED, AND WEEPING DOGWOOD.

We are confident that our stock of Dogwoods cannot be equalled either in quantity or quality. We have been growing them especially for some years. The Weeping was introduced by us. They are especially desirable for park and cemetery work.

See prices below.

Quercus palustris.—(Pin Oak.) 10 years growth; 20 feet high.

OAKS.

Oaks are our specialty, and we have the largest quantity of them of any nursery in the country.

At one time they had the reputation of being of slow growth. While this may be true of them in Europe it is not so here. In our nursery they grow just as fast as any other ordinary tree. Our sales of them increase every year. The White, Scarlet, Mossy Cup, Pin, Red and Black, are particularly fine sorts.

See page 11.

Berberis Thunbergii.—(Flowers pale yellow.)

It is undoubtedly the finest of all Berberries. Habit, dwarf, round and bushy, leaves small, green and very dense,--turning to a vivid scarlet in the fall. Flowers small, yellowish white, followed by deep scarlet berries, which are very conspicuous. It is unexcelled for dwarf ornamental hedges.

" " "	1 ft. tr.	2 50		
" radiata,	2 ft. tr.	3 50		

☞ Our stock of Hydrangea, p. g., is very large and the plants exceedingly fine, strong and bushy. We feel confident that they would more than please our customers.

LIGUSTRUM TRICOLOR.

Tricolored Leaved Privet.

For a low, thick hedge, few plants can equal this. It can be trimmed several times a year, like the California Privet, and after each trimming it will grow more bushy. The young foliage is yellow and green, but as it matures, the yellow changes to white. When it becomes better known, there will be a good demand for it as an ornamental plant. Its varied colors contrast nicely with the green foliage of other shrubs. See page 18.

JAPAN SNOWBALL—Viburnum plicatum.

This electrotype given to purchasers of plants on application.

When we first commenced growing this plant, our sales of it were but a hundred or two a year; but it is now so popular that though we are growing it by the thousands, yet we have scarcely enough to supply all orders. Some idea may be had of the great quantities we are now growing, when we say that we could supply fifty thousand plants of various sizes at this writing. Every nurseryman and dealer should handle it.

Dioscorea battatas, **Chinese Yam,**	1 year	1 50		
Dolichos Japonica,	1 year	2 00	18 00	
" "	2 years	3 00		

☞ The Dolichos dies to the ground the first winter or two, but shoots up again with additional vigor in the spring. The leaves are large and resemble the Lima bean. Valuable for situations where rapidity of growth is required, as it will frequently make from 30 to 50 feet of growth in one season. Hundreds have been used for this purpose at the World's Fair ground.

Our Retail Catalogue of Trees, Shrubs, etc., will be sent free to all applicants.

MEEHANS' MONTHLY.

DEVOTED TO

GENERAL GARDENING AND WILD FLOWERS.

An octavo magazine of 16 pages with a colored plate made by L. Prang & Co. of Boston, of a Wild Flower of some portion of the United States; with a chapter on wild flowers, and others on the more intelligent features of General Gardening. Illustrated with numerous wood-cuts. Issued monthly.

Conducted by THOMAS MEEHAN

Formerly Editor of the "*Gardeners' Monthly*" and of the "*Native Flowers and Ferns of the U. S.*"

Assisted by THOMAS B., J. FRANK., and S. M. MEEHAN.

Price, $2.00 per year, in advance.
SAMPLE COPY FREE

There was scarcely a nurseryman or prominent florist but what was a subscriber to the "GARDENERS' MONTHLY," and read it regularly. Since the commencement of "MEEHANS' MONTHLY" a great many of the old subscribers have again found pleasure and profitable reading in the pages of the new magazine, and we have received numbers of letters from prominent men in the trade welcoming "MEEHANS' MONTHLY" as an old friend. While it is not the intention of the conductor to pursue exactly the same line or cover all the ground formerly occupied by the "GARDENERS' MONTHLY" yet he believes that by giving a broader scope to the magazine it will be of as much interest as its predecessor.

From a business point of view we expect the support of every intelligent nurseryman and florist, as it is clearly their interest that the number and enthusiasm of their customers should be increased, which is the great task the magazine has started out to accomplish.

SAMPLE COPIES WILL BE GLADLY SENT ON APPLICATION

As an Advertising Medium, it will be unexcelled by any similar publication for advertising goods at retail. Its subscribers are nearly all people having large gardens, and who are the class of people who buy. Though the magazine has been but recently started we have already secured some of the largest advertisers, most of them taking space by the year.
